1. PRODUCT DESCRIPTION

Special water-based polymer coating, matt finish, for the care and refreshment of thoroughly cleaned or newly installed, non-absorbent floors. Suitable for residential and commercial use.

Benefits:

- Protects the floor.
- Reduces dirt adhesion and maintenance effort.
- Facilitates routine cleaning.
- Metal-free polymer dispersion.

Suitable Substrates:

- PVC / LVT.
- PU-coated surfaces (factory-made or handcrafted).
- Sealed wooden floors.
- Other floors (PU/EP coatings, polyolefin, rubber, stone) subject to site-specific assessment.

Note: Maintenance instructions for specific substrates are available at www.gerriets.com

2. APPLICATION

- Thoroughly clean the floor before application
- Shake the product well.
- Apply undiluted in a thin, even layer at a minimum of 15 °C.
- Repeat application for enhanced protection once the care film is walkable.

Notes:

- Avoid strong sunlight and drafts during application.
- Turn off underfloor heating beforehand.
- Remove excessive care product layers through occasional deep cleaning.

3. CONSUMPTION

- Initial care/refreshing: 25-30 g/m² per application (coverage: 30-40 m²/l).
- Maintenance cleaning: 0.1 liters per 100 m².

4. DRYING TIME

- Walkable after 30-60 minutes (water evaporation).
- Fully usable 12 hours after the final layer has dried.

5. STORAGE

- Protect from frost.
- Store cool and dry.
- Keep out of reach of children.

6. TECHNICAL DATA

- **Ingredients:** Water, polyacrylate, polyurethane, glycol ether, silicic acids, waxes, additives, fragrances, preservatives (BRONOPOL, ISOTHIAZOLINONE). May cause allergic reactions.
- **GISCODE:** GE10 (emulsions/dispersion).
- **ADR/RID:** Non-hazardous for transportation.
- **CLP/GHS:** Non-hazardous.

7. SPECIAL INSTRUCTIONS

- Use only products from the same batch.
- Pre-tests for film adhesion and coverage are recommended.
- Care film cannot transform glossy surfaces to matt.
- Special procedures for Antislip surfaces required.
